

UNCOVER NEW BUSINESS EFFICIENCIES WITH AI-POWERED LEASE ABSTRACTION AUTOMATION

RRD GO Creative™ REIT Accounting Services

REITs own and manage a large number of properties, each with multiple leases. Lease abstraction allows them to quickly and easily understand the terms and conditions of each lease across their portfolio, so they can better manage their properties. However, the abstraction process can be time-consuming, inconsistent, and complex due to the lack of a standardized format and the use of industry and legal terminology. RRD GO Creative™ REIT Accounting Services takes the pain out of lease abstraction with its AI tool and a global pool of REIT service experts. We bring you a customizable, comprehensive lease abstraction automation platform that will help you augment lease abstractors with AI-powered, highly accurate, abstraction summaries.

FASTER. SMARTER. BETTER.

Our easy-to-use AI platform for lease abstraction, retrieval, and analysis is ideal for REITs that are looking to unlock higher levels of efficiencies and gain a valuable competitive edge. With our automated solution, REITs can:

Automate end-to-end lease data abstraction process

Auto-summaries of lease in minutes

Streamline the lease abstraction process

Detect lease risk clauses

Grouping of related lease documents

Perform intelligent data extraction

THE RRD GO CREATIVE™ ADVANTAGE

-  100% No Code; AI-first
-  Template-free; even for 1000+ pages, complex documents
-  Integrated predictive intelligence, search, and process automations
-  Interpret and analyze the extracted data points, eliminate manual reviews

FEATURES

-  End-to-end automation with AI at the core
-  Compatible with PDF/scanned document to abstract the data
-  Processes both structured and unstructured data
-  Automated text recognition in document and web data
-  ISO 27001:2013 and SOC 2-certified

APPLICATION SCOPE

Our solution can be applied to all lease document abstractions specifically designed for REIT and property management firms.

- Lease abstractions in Excel
- Lease validations and integrations to system

BENEFITS

-  **Capture:** for real-time monitoring
-  **Search:** For high-precision contextual results
-  **Analyze:** To make informed decisions
-  **Automate:** To maximize efficiency and quality
